**admin-panel-**

in admin panel we will add a product here is a flow:

1. We have to add atributes of product in three level basic , standard ,premium
2. Using this 3 classes (basic,standard,premium) we will make a product according to user ,
3. We will create or update category according to product

[admin-panel \(admin-9868.web.app\)](#)

**this project is deploy in free server so you have to fase some issue when u are using**

- **Client live vendor project** – Based on gaming slot booking you assume as a owner of the gaming club here you can addgame,check bookings list , book slot, access canteen item ,bill genrater , canteen item booking option, report analysis YVS

**Checkotp in inspect > network > response**
